ABOUT

Perfect solution to enlarge existing holes professionally in seconds!

Innovative tool combining both A1 & A2 arbors.

Compatible with traditional hole saws between 14 mm - 210 mm.

Avoids the use of separate A1 & A2 arbors with this innovative 2-in-1 tool.

No attachment or assembly required.

FREQUENTLY ASKED QUESTIONS

Q: How does the Duoxim Arbor Max work to enlarge existing holes?

A: Simply screw the desired hole saw onto the arbor. Screw the old size hole saw using the longer threads. Then lock in the longer pins to stop the hole saw seizing. Finally easily and professionally enlarge your hole.

Q: Is this an A1 or an A2 arbor?

A: This is both an A1 & A2 arbor that will fit traditional hole saws between 14mm-210mm.

Q: What is the benefit of having a 2 in 1 arbor?

A: You can use it as just an A1 or just an A2 arbor, but when combined, it can save a lot of time from first fix to second fix jobs. This feature with the ability to easily enlarge holes makes it the perfect arbor.

APPLICATION

Compatible with traditional hole saws 14 mm - 210 mm allowing for a wider range of applications

Solution to upgrading existing downlighters or fixing any wrong size holes

Saves time and provides a professional finish rather than using traditional pad saws

Features two longer pins preventing both hole saws seizing together

Toolless quick release arbor allowing for instant change of hole saws
