

ABOUT

The Smarter Way to Inspect Underground

Designed for short-distance duct inspections up to 30 metres. Mounted on a semi-rigid cable, it can be easily pushed through ductwork to deliver live video, record footage, and capture photos directly to a phone or tablet. Ideal for underground and commercial duct systems, it enables accurate diagnostics, layout mapping, and documentation without the need for excavation or dismantling.

APPLICATION

- Detects blockages and obstructions
- Identifies damage such as cracks, corrosion, or leaks
- Verifies condition during maintenance checks
- Improves reporting with timestamped media, sound recording, and notes
- Enhances safety - no need to enter confined or hazardous spaces
- Saves time and money by pinpointing issues without invasive procedures

CONTENTS

1 x V7 Wireless Camera, 1x Small Guide Bracket 40mm, 1 x Large Guide Bracket 80mm, 1 x USB Charging Cable Type C to Type C
