PROBLEM SOLVED

This kit saves time on EICR testing. It keeps all your testing accessories in one place, organised and ready to go.

Magnetic Link Test Kit

SRMLTK

- **SRR1R2** - High strength magnetic link used for continuity testing of R1 + R2. Saves time during testing. Eliminates the risk of damaging connections and the need to remove conductors. Speeds up inspection reports.
- **SRIR** - High strength magnetic link for insulation resistance testing of Line and Neutral to Earth on RCBO protected circuits. Speeds up EICR's, saves time, facilitates testing in line with BS7671.
- **Kit Case** - Single-Zipper pouch keeps all your testing accessories organised, safe and easily accessible. Features reinforced transparent side panel and also includes a carabiner.
- **Contents:** 1 x SRR1R2; 1 x SRIR; 1 x Transparent Tool Pouch
